

GENESIS[®]

G A S B A R B E C U E S

Take a look inside a Weber® Gas Barbecue and see the quality, workmanship, and durability that make it the best gas barbecue you can own!

INTELLIGENT

Because of its superior design, you won't find messy lava rocks inside a Weber Gas Barbecue. Lava rocks collect grease and cause uncontrollable flare-ups.

PERFORMANCE

Two layers of specially angled Flavorizer® Bars are the key element of the Weber Cooking System. They distribute heat evenly through the grill and vaporize drippings to create barbecue flavor without flare-ups.

CONTROL

Three stainless steel burners run the full length of the cooking box to offer controlled cooking, energy efficiency, and even heat.

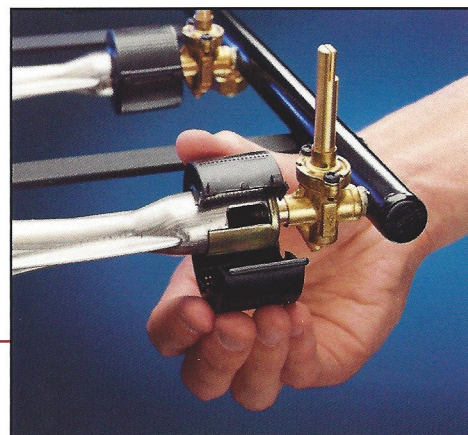

INSPECTION

Our quality control inspectors conduct an ignition and burn test on every gas barbecue. Each burner must light with a stable, blue flame before it goes into the carton.

SAFEGUARD

Air intake guards are factory installed to keep burners free from debris and insects.

EXPANDED

Warming racks provide extra cooking area. Perfect for cooking vegetables and warming breads.

DURABLE

Porcelain-enameled cooking grates are easy to clean and resist rusting.

ACCURATE

Dual-purpose thermometer monitors the temperature inside the grill, or can be used as a probe to check doneness of food.

CONFIDENCE

The easy-to-read fuel scale prevents you from being caught off guard with an empty fuel tank.

CONVENIENCE

Weather-resistant wood swing-up tables lift securely into place when extra work space is needed.

CLEANUP

Durable bottom tray funnels excess juices into a disposable aluminum pan for easy cleanup.

INTEGRATION

The perfect combination of high-quality materials and engineering expertise.

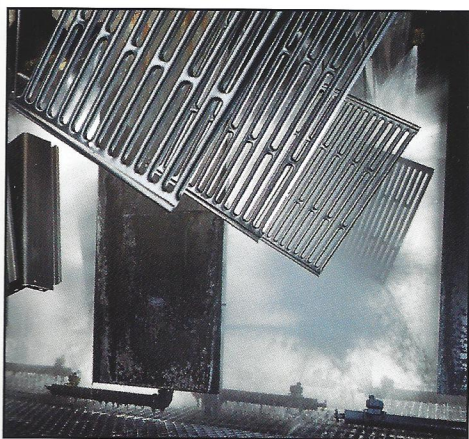

QUALITY

Even the highest quality materials need protection. All steel parts and aluminum castings are cleaned and treated with a corrosion preventative for years of rust free service.

WORKMANSHIP

After the foundation of black porcelain enamel is fired onto the lid, attractive second coat colors must be hand applied by skilled operators.
