KETTLES

Why Foods Cook Better . . .

IN A WEBER!!

WEBER kettles cook with reflected heat to combine the economy of an oven with the zest of a barbecue.

With the exclusive **WEBER** cover in place, foods cook in their own juices—stay flavorful juicy and tender even when "well done."

A unique damper system controls heat to suit you—brings out the matchless flavor of the finest cuts . . . even less expensive meats are transformed into gourmet delights.

WEBER PRINCIPLE

Uses two grills, the upper for food, the lower for charcoal. Air circulates all through the charcoal to distribute heat evenly and seal in flavor and juices.

WEBER ECONOMY

WEBER kettles are built to outlast ordinary barbecues and what's more, **WEBER** gives you real economy too.

Use fewer briquettes to begin with—when through, close all dampers and coals go out almost instantly. Use the same coals up to 5 times—practically pays for itself in charcoal savings alone!

THESE NEW **WEBER** ACCESSORIES ADD ENJOYMENT TO OUTDOOR BARBECUING!!
