USE OF WEBER RECIPES

1. All recipes in this book have been developed on the basis of 70 degree weather and little or no wind. Therefore, if you are cooking on a cold and/or windy day it may be necessary to allow more time.
2. All meats in the recipes were at refrigerator temperature when put on the grill unless otherwise noted.
3. The cooking times in this book should be used as guide lines, not exact cooking times. Allow slightly more minutes per lb. for a smaller piece of meat and fewer minutes per lb. for a larger one.
4. When you combine 2 or more items on the grill at the same time, allow a slightly longer amount of time. More food means more places for the heat to be absorbed.
5. MSG used in the recipes refers to monosodium glutamate. Use in optional.

ONE TOP AND THREE BOTTOM VENTS control heat and keep air circulating inside for even cooking. Closing vents extinguishes charcoal for future use.

SOLID TEAKWOOD HANDLE weather resistant

PORCELAINIZED OUTSIDE AND INSIDE. Won't rust out, burn out or stain. Cleans like your oven.

HEAVY GAUGE STEEL for longest life. Lid is made of 20 gauge, bowl of 18 gauge steel. Lasts years beyond ordinary grills.

EASY-TO-CLEAN PLATED GRILL has opening at handles for the safe and easy addition of more charcoal.

HEAVY DUTY CHARCOAL GRILL allows charcoal to burn evenly.

PATENTED LEG COUPLING, porcelainized to resist corrosion. No thumb screws necessary.

ALUMINUM ASH CATCHER positioned outside of kettle for unobstructed air flow inside. Make ash disposal easy too!

STRONG PLATED BRACE doubles as convenient tray.

HIGH IMPACT MOLDED WHEELS roll smoothly when moving kettle.

Getting to know your Weber charcoal cooker

Helpful Hints

COOKING TIPS

1. Top and bottom vents should be open when starting charcoal and while cooking. If you find the fire is too hot, the bottom dampers may be partially closed to regulate heat intensity.
2. Close vents when finished cooking to extinguish coals. **DO NOT USE WATER** to extinguish coals, as it may damage porcelain finish.
3. To adjust vents, use barbecue mitts or hot pad.
4. Vent in cover should be positioned opposite long leg when cooking.
5. When using indirect method, cooking grill handles should be directly over coals. Add charcoal through opening at grill handles without removing cooking grill.
6. When moving kettle, one hand should be kept on the lid handle to assure proper balance.
7. **Note: For proper air flow, remove accumulated ashes from bottom of kettle.**
8. Always use tongs for turning meats to avoid piercing meat and losing natural juices.

TEMPERATURES

Use a meat thermometer for complete accuracy. Inserted thermometer should not touch fat or bone.

Temperatures to be reached are:

Beef, rare	140	Ham, fully cooked	140
Beef, medium	160	Fowl	185
Beef, well done	170	Lamb, rare	140
Pork, well done	185	Lamb, medium	160
Pork, smoked & cured	160	Lamb, well done	180

KETTLE CARE

Following these simple steps will give you many years of long lasting service.

For quick cleaning:

1. When surface is badly coated with burned-on grease, you can use a good spray-type oven cleaner. Follow manufacturer's directions on cleaner.
2. Rinse and dry. (Do not use water on hot kettle)
3. Clean cooking grill with wire brush or ball of crumpled aluminum foil. Wipe off remaining residue with paper towel.
4. Protect during storage with Weber Vinyl Cover.

HOW TO MAKE AN ALUMINUM FOIL PAN

1. Use 18-inch heavy duty aluminum foil.
2. Tear off a sheet which after being doubled will extend at least 3 inches beyond each end of meat being prepared.
3. Fold foil to make a double thickness.

4. Fold all edges over about 1½ to 2 inches.

5. Entire piece should be flat.

6. Turn piece over and score all the way around one inch from edge with a sharp object or your fingernail.
7. At corners, score from point where scores cross, out to the corners.

8. Fold all edges up.
9. Pinch the corners.

10. Fold corners back flat against sides.

THE WEBER COVER

Key to easy cooking.

IMPORTANT:

Cook with the cover on your Weber kettle.

Don't use half your Weber kettle. Covered cooking is what Weber's all about. Here's why:

No flare-ups: With the cover in place open flame cannot exist. Air flow is sufficient to allow charcoal to burn evenly. No need for water squirt bottles or panicky removal of those precious steaks.

Cooking ease:

You can cook quickly with confidence of success. The cover reflects heat evenly all around the food. You don't need a rotisserie. The Weber kettle does the work and you do the enjoying.

Remarkable speed:

The Weber kettle is designed for optimum heat retention. Heat is reflected off all surfaces (especially the cover) back onto the food — so cooking time is greatly reduced.

Delicious flavor:

Reflected heat seals in the natural flavor and juices of all kinds of foods. They come out from under the Weber cover tasting tender, moist and delicious.....as we said — Something Happens Only In A Weber Kettle That Gives Foods A Fantastic Flavor — part of it is because of the Weber Cover — so use it.

Your WEBER KETTLE is simple to use.

To start:

1. Position kettle—position long leg (leg without wheels) into the wind (two vents toward wind)
2. Remove cover and hang on kettle rim (there's a hook inside the cover)
3. Remove cooking grill
4. Position charcoal grill—grids should run parallel to long leg.
5. Open dampers all the way. 3 on bottom, 1 on cover.
6. Directions differ depending on the food you're going to cook. Choose the direct or indirect method of cooking and follow the instructions on the right.

Direct Method

For cooking steaks, chops, hamburgers. Meat is cooked directly over the coals, absorbing the full heat of the coals.

When you see this symbol with a recipe in this book, cook the direct way with coals directly under the food.

1. Spread charcoal one layer deep over charcoal grill.
2. Heap charcoal in center of grill.
3. Ignite charcoal (Be sure cover is off kettle)
4. When coals have a light coating of gray ash (about 30 minutes), spread them one layer deep again
5. Put cooking grill in place.
6. Place meat on grill. If you wish to sear the meat, leave cover off and sear as desired —
7. Cover kettle and cook according to directions in recipe.

Note: Include searing time in total cooking time.

Indirect Method

For cooking whole meats such as: roasts, turkeys, hams, etc. Equal amounts of charcoal are placed on two sides of the Kettle. Heat rises, reflects off cover and kettle surfaces—to cook food above and below—all around like an oven.

When you see this symbol with a recipe in this book, cook the indirect way with coals on sides of grill.

1. Position charcoal rails on sides of charcoal grill. (illustration)
 2. Place an equal number of briquettes on each side of kettle. For number of briquettes to use, see chart on right.
- Note:** For meats that require more than an hour to cook, additional briquettes must be added as indicated in chart.
3. Ignite charcoal. Leave cover off until coals have a light coating of gray ash (about 30 min.). Make sure both sides are burning evenly.
 4. Center drip pan between charcoal rails. If you want gravy, place meat in roast holder inside drip pan and center on cooking grill.
 5. Position cooking grill in kettle with handles directly over coals.
 6. Place food on cooking grill, directly over drip pan.
 7. Cover kettle! Consult recipe for recommended cooking times.

How Many Briquettes To Use

Kettle Series	8000	7000	3000	Smokey Joe
Diameter of grill— inches	26½	22½	18½	14½
Briquettes needed on each side for first hour	30	25	16	9
Number of briquettes to add to each side every hour	9	8	5	4

BEEF

STEAK

Rib, T-Bone, Club,
Porterhouse, Sirloin or Filet
(¾—1 pound per person)
Salt and pepper

USE DIRECT METHOD

To prevent steak from curling during cooking slit fat at 1½–2 inch intervals. Refer to steak cooking chart below for cooking times. Cover steaks when cooking. Covering helps to eliminate flare-ups. If you prefer searing steak, leave cover off for the first minute or two on each side. Use meat tongs when turning steak to prevent piercing and loss of natural juices.

Steak Thickness	Rare		Medium		Well Done	
	1st side	2nd side	1st side	2nd side	1st side	2nd side
1"	2 min.	3 min.	4 min.	4 min.	5 min.	6 min.
1½"	5 min.	6 min.	7 min.	8 min.	9 min.	10 min.
2"	7 min.	8 min.	9 min.	9 min.	10 min.	11 min.

SHISH KABOB

Beef tenderloin, cut in 1–1½" cubes
(Or if you are going to marinate, you can use a cheaper cut of meat, i.e. rump, sirloin)
New potatoes, small—about 1½–2" in diameter
White onions, small—about 1" in diameter
Fresh mushrooms
Cherry tomatoes

Shish kabob marinade
(optional)
(See recipe P-21)

USE DIRECT METHOD*

Any combination of items that can be cooked on a skewer can be tried as shish kabob. However, keep in mind that if you choose foods which require similar cooking times, everything will be done at the same time. If, however, you choose foods with a wide variety of cooking times, such as we have, then use a separate skewer for each different food.

Wash potatoes, mushrooms and tomatoes. Clean onions and cut up meat. Skewer each of the items on its own skewer. Use smallest skewers for mushrooms and tomatoes.

*Use fewer briquettes and space them far apart so heat is less intense.

Put onion and potatoes on first. They require 35-40 minutes. Meat goes on second. Plain or brushed with barbecue sauce, it requires 20-25 minutes. Marinated, it requires 15-20 minutes. Mushrooms require 15-20 minutes. Cherry tomatoes require 5-10 minutes.

Be sure to turn skewers at least once during cooking, especially meat, onion and potato skewers. Remember that shish kabobs require your attention because heat is direct. Extra flavor can be obtained by brushing mushrooms, potatoes and onions with butter but be careful—the grease may cause flareups. When food is done, remove it from skewers and serve it on a platter.

POT ROAST

Lean chuck roast, round bone
or blade cut
Salt, pepper, MSG

BEEF

ROLLED RUMP ROAST

Arrange meat, potato, onion, carrots, green pepper slices and mushroom caps in the center of the foil. Spoon the mushroom soup mixture over all; top with a tbls. of butter; sprinkle with parsley. Double fold top and edges to seal securely. Place in center of cooking grill and cook for 1 $\frac{1}{4}$ hours or until meat is tender. Serve in foil. Makes 4 servings.

LAMB

LEG OF LAMB

Leg of lamb
Salt and pepper
Garlic (optional)

USE INDIRECT METHOD

Season leg of lamb generously with salt and pepper. If you use garlic, cut several small slits in surface of meat, insert small piece of garlic in each slit. Place lamb in roast holder and center on cooking grill over drip pan. An 8 pound leg requires approximately 18 min. per lb. (180°) to be well done.

(refrigerator temperature)
Salt, pepper, MSG

USE INDIRECT METHOD

Then move them to center of grill over drip pan and cook for 20 minutes. If you are having guests, use Weber's rib rack and double your cooking space by setting chops upright in rack.

PORK

PORK CHOPS

3/4—1 inch thick pork chops
Sage (optional) Salt, pepper, MSG

USE INDIRECT METHOD

Rub chops with sage if you wish. Season with salt, pepper and MSG. Place chops on sides of cooking grill directly over hot coals and sear with cover off approximately 2—2½ minutes until lightly browned. If you are cooking large number of chops, use our rib rack and double your cooking area by placing the chops upright in the rack.

ROLLED PORK LOIN

Lean, rolled pork loin
(¾ lb. per adult) Salt, pepper, MSG

USE INDIRECT METHOD

Season roast with salt, pepper and MSG. Insert meat thermometer in thickest part of roast. Place roast in roast holder on cooking grill, fat side up, directly over drip pan. A 6 pound roast requires 17 min. per lb. to be well done (185°).

SPARE RIBS OR BACK RIBS

Lean meaty ribs Salt and pepper
(at least 1 lb. per person) Weber's tangy barbecue sauce

USE INDIRECT METHOD

Prepare ribs by peeling off tough layer of skin on back side and seasoning them with salt and pepper. Place seasoned ribs in a rib rack over drip pan and cook for approximately 75 minutes. Baste with barbecue sauce during last 20 minutes of cooking time. Using Weber's rib rack will double the amount of ribs that may be cooked at one time. If you do not have a rib rack, seasoned ribs may be placed in center area of cooking grill directly above drip pan.

VARIATION

Sear seasoned ribs over hot coals on sides of cooking grill until browned. Place ribs in an aluminum foil pan and cover with sauerkraut. Position foil pan in center of cooking grill and cook for one hour.

Remove any rind left on ham and score fat diagonally to give a diamond effect. Insert a whole clove in center of every diamond. Center ham, fat side up, on cooking grill directly above drip pan. Cover kettle. About 9 min. per lb. is suggested timing for fully cooked ham. Since it can be eaten without cooking, any temperature you desire is safe. Smoked or cured ham, which is not fully cooked, should be cooked to an internal temperature of 160°. Baste with brown sugar glaze during last 30 minutes of cooking time. Garnish with pineapple rings and cherries about 15 minutes before end of cooking time, brush with glaze.

PORK TENDERLOIN SURPRISE PACKAGES

2 slices bacon
1-1½ inch slice of pork tenderloin
Salt, pepper, MSG
¼ inch slice sweet white onion
½ inch slice tomato

Begin by crossing 2 slices of bacon and placing slice of pork tenderloin where bacon slices cross. Season with salt, pepper and MSG. Place onion on top of pork tenderloin, then tomato and finally, green pepper. Bring bacon slices up around stack and secure them on top with a toothpick. Place tenderloin package on cooking grill directly over a drip pan and cook for 55 minutes. Before serving, place a slice of cheese on top and heat until cheese melts. Each package serves one.

WEBER DAGWOOD SPECIAL

Poor boy buns (1 per person)
Butter or margarine
Genoa salami, thinly sliced
Mozarella or Provolone cheese, sliced or grated
Baked ham, sliced
American cheese, sliced or grated
Tomatoes, thinly sliced
Green peppers (sweet or hot) sliced thin or chopped

USE INDIRECT METHOD

Slice poor boy buns in half lengthwise and spread both halves with butter or margarine. On bottom half, put a layer of salami, Mozarella cheese, another of salami, then baked ham, American cheese and tomatoes. Place green pepper on top. Place this portion of bun on a piece of aluminum foil in center of cooking grill. Cook 5 minutes. Place top half of buns on foil with buttered side up and cook sandwich open-faced for 7 minutes. When done, cheese will be melted and tomatoes and peppers partially cooked. Remove from grill and put 2 halves together. Each sandwich makes a meal for one.

POULTRY

TURKEY

Turkey (select any size that will fit your kettle and allow approximately 1 pound per person)

Peanut Oil
Salt, pepper, MSG

USE INDIRECT METHOD

Rinse turkey thoroughly with cold water, drain and pat dry with paper toweling. Lock wings behind back and tie legs and tail together securely. Rub entire bird with peanut oil and season generously with salt, pepper and MSG. Put turkey in roast holder and position on cooking grill directly over drip pan. A 20 pound turkey will require about 11 minutes per pound (185°F) to be well done. If the bird is stuffed, it is necessary to add 2 extra minutes per pound to cooking time.

TURKEY STUFFING

2-1 lb. loaves of bread, toasted or slightly dry

Giblets from bird plus giblets from 3 chickens

2 large stalks celery, ground

1 medium onion, ground

½ lb. fresh pork sausage

1 egg

¼-½ tsp. sage (depending on how much sage is in the pork sausage)

Salt and pepper

Cut or tear dry bread into small cubes and put them in a large bowl. Cook giblets and grind them together with onion and celery. Place pork sausage in a skillet and simmer until cooked. Add all ingredients to bread crumbs; use giblet water to moisten the stuffing and mix well. Stuff turkey and sew up cavity. Any extra stuffing can be baked alongside turkey in an aluminum foil pan. Makes enough stuffing for a 20-23 pound bird. When bird is done, you may want to spoon some drippings over stuffing for extra moistness and flavor.

DUCKLING OR GOOSE

USE INDIRECT METHOD

Rinse bird thoroughly with cold water, drain and pat dry with paper toweling. Season generously with salt and pepper, inside and out. Use a sharp knife to make a cut between wing joints and breast to permit draining of excess fat during cooking. Lock wings behind back and

tie legs together. Put bird in a roast holder on cooking grill directly above drip pan. Cook approximately 20 minutes per pound (185°F). When the bird is about two-thirds done, cut string holding legs together. Since birds vary in type and size, roasting times are only approximate and you may have to increase or decrease indicated time.

CHICKEN—PARTS AND HALVES

Broiler-fryer chicken, parts or halves

Salt, pepper, MSG

USE INDIRECT METHOD

Rinse pieces of chicken in cold water and pat dry with paper toweling. Season generously with salt, pepper and MSG. Center chicken on cooking grill over drip pan and cook for 55-60 minutes. If basting chicken, do so after 30 minutes. Marinating should be done 4-6 hours or overnight in refrigerator. If you have a large group, use rib rack for chicken pieces to double your available cooking area.

CHICKENS—WHOLE

2½-3 lb. broiler-fryer chicken

Salt, pepper, MSG
Peanut Oil

USE INDIRECT METHOD

Wash chicken thoroughly with cold water and pat dry with paper towel. Lock wings behind back and tie legs securely together. Rub with peanut oil and season generously with salt, pepper and MSG. Place chicken in roast holder on cooking grill over drip pan and cook 80 minutes (185°F). If you wish to baste chicken, do it the last 30 minutes of cooking time.
